

External Stainless Steel Probe 8

External Stainless Steel Probe 8

External Stainless Steel Probe 8 is designed to monitor temperature in areas where the other ServersCheck's sensors can't be used. Following applications are made possible with the External Stainless Steel Probe 8: freezer, cold storage, liquids, equipment, healthcare, pharmacies, winery, etc.

TECHNICAL SPECIFICATIONS

Temperature Resolution: 0.1°C (0.18)°F precision

Temperature Accuracy: +/- 0.5°C (+/- 0.9 °F) from 0°C to +85°C / +/- 1°C for other ranges

Temperature Reading: -55°C to +125°C (-67°F to +257°F)

Sensor Housing Dimensions: 65 mm (2.5") x 95 mm (3.74") x 55 mm (2.16")

Sensor Housing Material: IP 65 plastic housing

Sensor Housing Colour: light gray

RJ45 Cable Gland Protection Rating: IP 68

Probe Dimensions: 50 mm long with Stainless steel probe with 1.82 m (6 ft.) long,
high-temp silicone rubber cable
